I am a third-year student at the Faculty of Computers and Artificial Intelligence at Helwan University.

I love computer science in general and front-end development in particular.

I contributed to several projects during my studies in college, such as a cooking site and a site to predict a patient's illness based on his symptoms, etc. I have done many projects on my own from start to finish which has added to my experience.

I am still looking forward to developing myself more and more.
